

PHASE 2: 2.1

EOI Online Submission Outline

December 2024

Revised on January 15, 2025

1. Describe the industry problem that will be solved and include an overview of the RDI, technologies, or industrial solutions that will be employed to design, develop, build, and deploy the proposed solution.

[Upload up to 3 images; 400-600 words]

2. Provide a brief overview of the industry partners that will drive the proposed project grant and include the following:
 - (a) Background of the industry context and the industry partner.
 - (b) An overview of the academic partner (researcher, team, laboratory, center, institute, etc.).
 - (c) A history of engagement between the academic entity and the industry, or if it is a new partnership, how the partnership was developed.

[250-300 words]

3. Outline the ongoing value for industry that the proposed solution will generate and include an overview of any related economic value, industrial efficiencies, safety, or competitive advantages.

[150-200 words]

4. Explain how the proposed solution will enable the industry to grow more ethically and sustainably through the partnership and solution.

[200-300 words]

5. Describe how the proposed solution will facilitate future opportunities for higher-skilled jobs within the industry and industry sector.

[250-300 words]

6. Describe how the proposed solution project will impact either future research, future curriculum design, or future industry-academia engagement strategies.

[200-300 words]

Total maximum word count: 2000 words
